ABOUT ME

Matteo Paglieri

Industrial designer

PROFILE

I combine product vision with hands-on digital fabrication, developing prototypes through 3D printing and laser cutting. My work focuses on design for children, inclusivity and versatility, always with a result-oriented mindset — both independently and as part of a team.

SKILLS

3D & CAD Rhinoceros, SolidWorks, Fusion 360, AutoCAD

Render KeyShot, Blender

Graphics InDesign, Illustrator, Photoshop

Fabrication FDM 3D printing, laser cutting

LANGUAGES

Italian — native
English — B1, TOEIC 740

CONTACTS

matteo.paglieri@gmail.com
+39 331 155 4911
LinkedIn — Matteo Paglieri

Varese, Italy

EXPERIENCE

OCT 2026 — PRESENT
Design Intern | Studio Luca Boscardin
Rovereto (TN) · Toys and design objects for brands

APR 2026 — PRESENT
Industrial Designer (Freelance)
Varese

JUL 2026 — OCT 2026
Laser Cutting Operator | Asso Retail Sagl
Grancia, Ticino (CH)

APR 2025 — JAN 2026
Game Designer | Sassi Junior
Freelance · Children's board game, out Feb 2027

EDUCATION

JAN 2025 — DEC 2025
Master in Design for Children (110 cum laude)
IED Rome

SEP 2021 — JUL 2024
Bachelor in Industrial Design (103/110)
Politecnico di Milano

WORKSHOPS & AWARDS

JUN 2024
Workshop Studio Suzuki | Panasonic Asia
Politecnico di Milano

APR 2023 — MAY 2023
Inclusive Hackathon
Work published in "Design & Autism", Maggioli Editore

PROJECT — 2023

Tetide e Siviglia

A chair and a table conceived as a pair for the contemporary dining room.

YEAR	2023
TYPE	Furniture · chair and table
CONTEXT	Bachelor in Industrial Design, Politecnico di Milano — concept for Riflessi
TEAM	M. M. Caccia, F. Ghioni, M. Vannucci

Tetide

With its 18 mm steel tube frame, Tetide has a modern, refined look that fits into any environment.

Seat and backrest are enveloping and upholstered in Taylor fabric or velvet, for comfort and timeless style.

H 84 · W 44 · D 58 cm

VELVET

Aqua · Blue · Pink · Green

TAYLOR FABRIC

Bordeaux · Cream · Olive green

STEEL FRAME

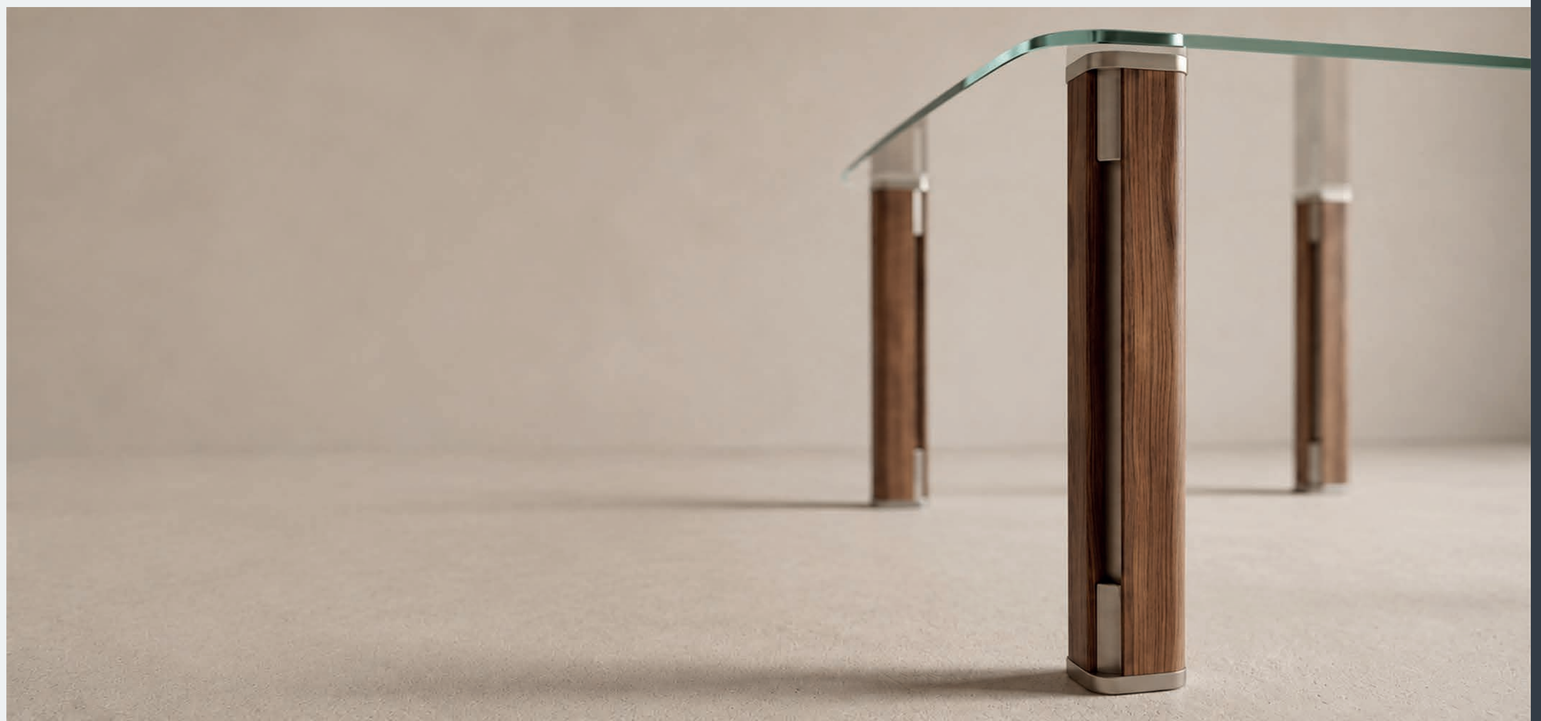

Pearly · Pink gold · Graphite · Champagne

Siviglia

Four legs composed of triangular wooden sections, joined by a T-shaped support in Zamak alloy that guarantees stability and adds a contemporary touch — all visible through the tempered glass top.

H 74 · L 220 · W 110 cm

WOODEN LEGS

Walnut · Natural oak · Ebony oak

SUPPORTS

Pearly steel · Brushed steel · Graphite · Champagne

TOP

Crystal glass

TETIDE E SIVIGLIA

PROJECT — 2024

Epta Living

A modular smart locker that brings fresh and hot meals into co-living and co-working spaces.

YEAR	2024
TYPE	Refrigerated & heated modular locker
CONTEXT	Politecnico di Milano
PARTNER	In collaboration with Epta

A locker that grows with the community.

Epta Living can be installed in residential co-living or co-working spaces and configured according to requirements. Refrigerated or heated modules let residents and workers store and collect hot or cold meals at any time.

1×	Module with 19" touch screen
2×	Modules, heated or cooled
N×	Modules with 3 lockers, heated or cooled
50 l	Capacity of each module

Stainless steel, glass and colour.

The structure is built in AISI 304 stainless steel: bare sheet metal for the internal sliding compartments, black-painted finish for door frame and hinges.

The side cover in bare AISI 304 sheet is clad with an ABS panel available in different colours.

Black screen-printed glass is used for the spatial dividers and for the double-glazed window of the front door.

COLOURED ABS SIDE COVER

HEATED / COOLED COMPARTMENT

PROJECT — 2025

Altalinea

An elastic net suspended between steel arches, opening up the playground to imagination in motion.

YEAR	2025
TYPE	Playground equipment
CONTEXT	Master in Design for Children, IED Rome
PARTNER	In collaboration with Magis
TUTOR	Luca Boscardin

Every curve hides a new way to play.

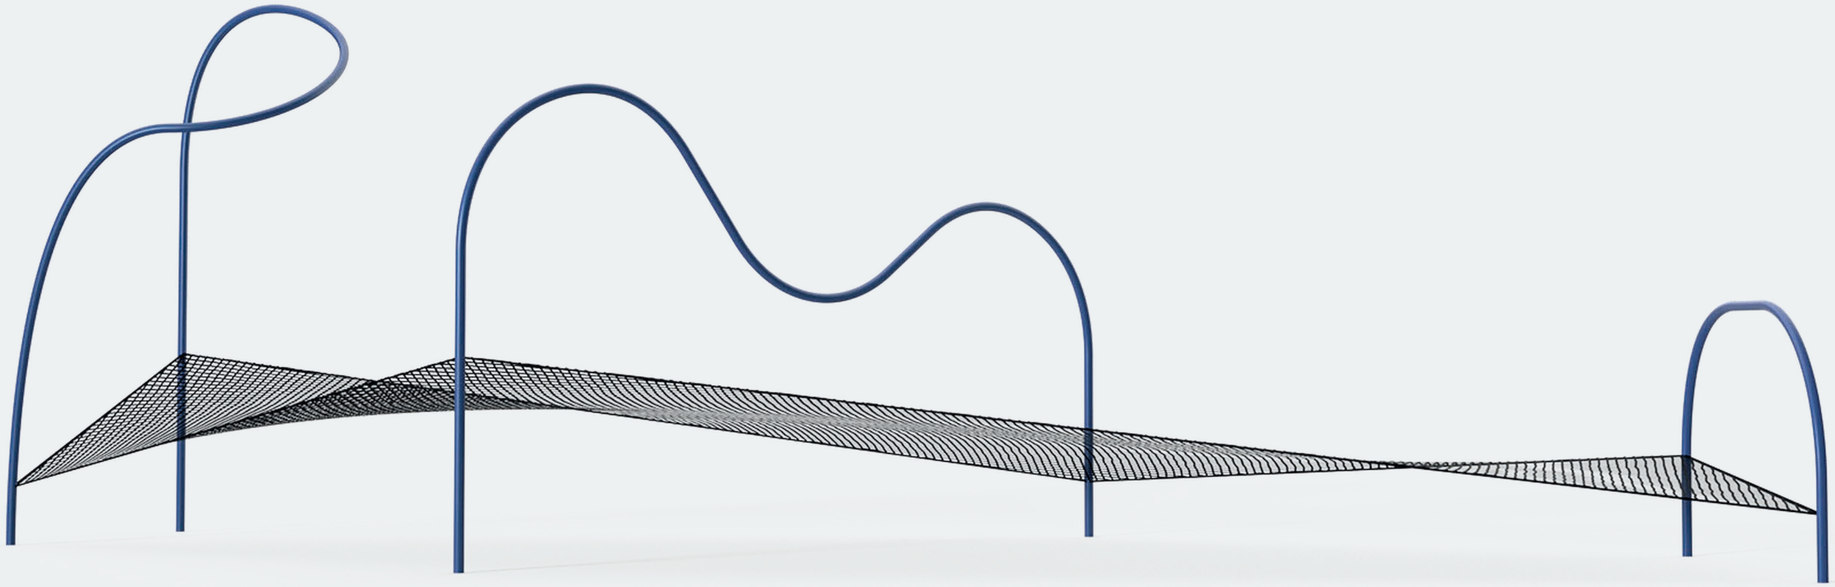

Altalinea is an invitation to explore. An elastic net, suspended between tubular steel arches, turns the playground into a landscape that changes with every child who crosses it.

By changing the height at which the net is attached to the frame, potentially endless shapes, waves and curves can be created, bringing movement to the playground.

One structure, three levels of challenge.

Expert area

Advanced development of coordination and problem solving.

Intermediate area

Consolidation and self-assessment of movement.

Beginners area

Motor exploration and perceptual safety.

“The playground is a state of mind even before it is a physical space and an activity.”

DOMITILLA DARDI

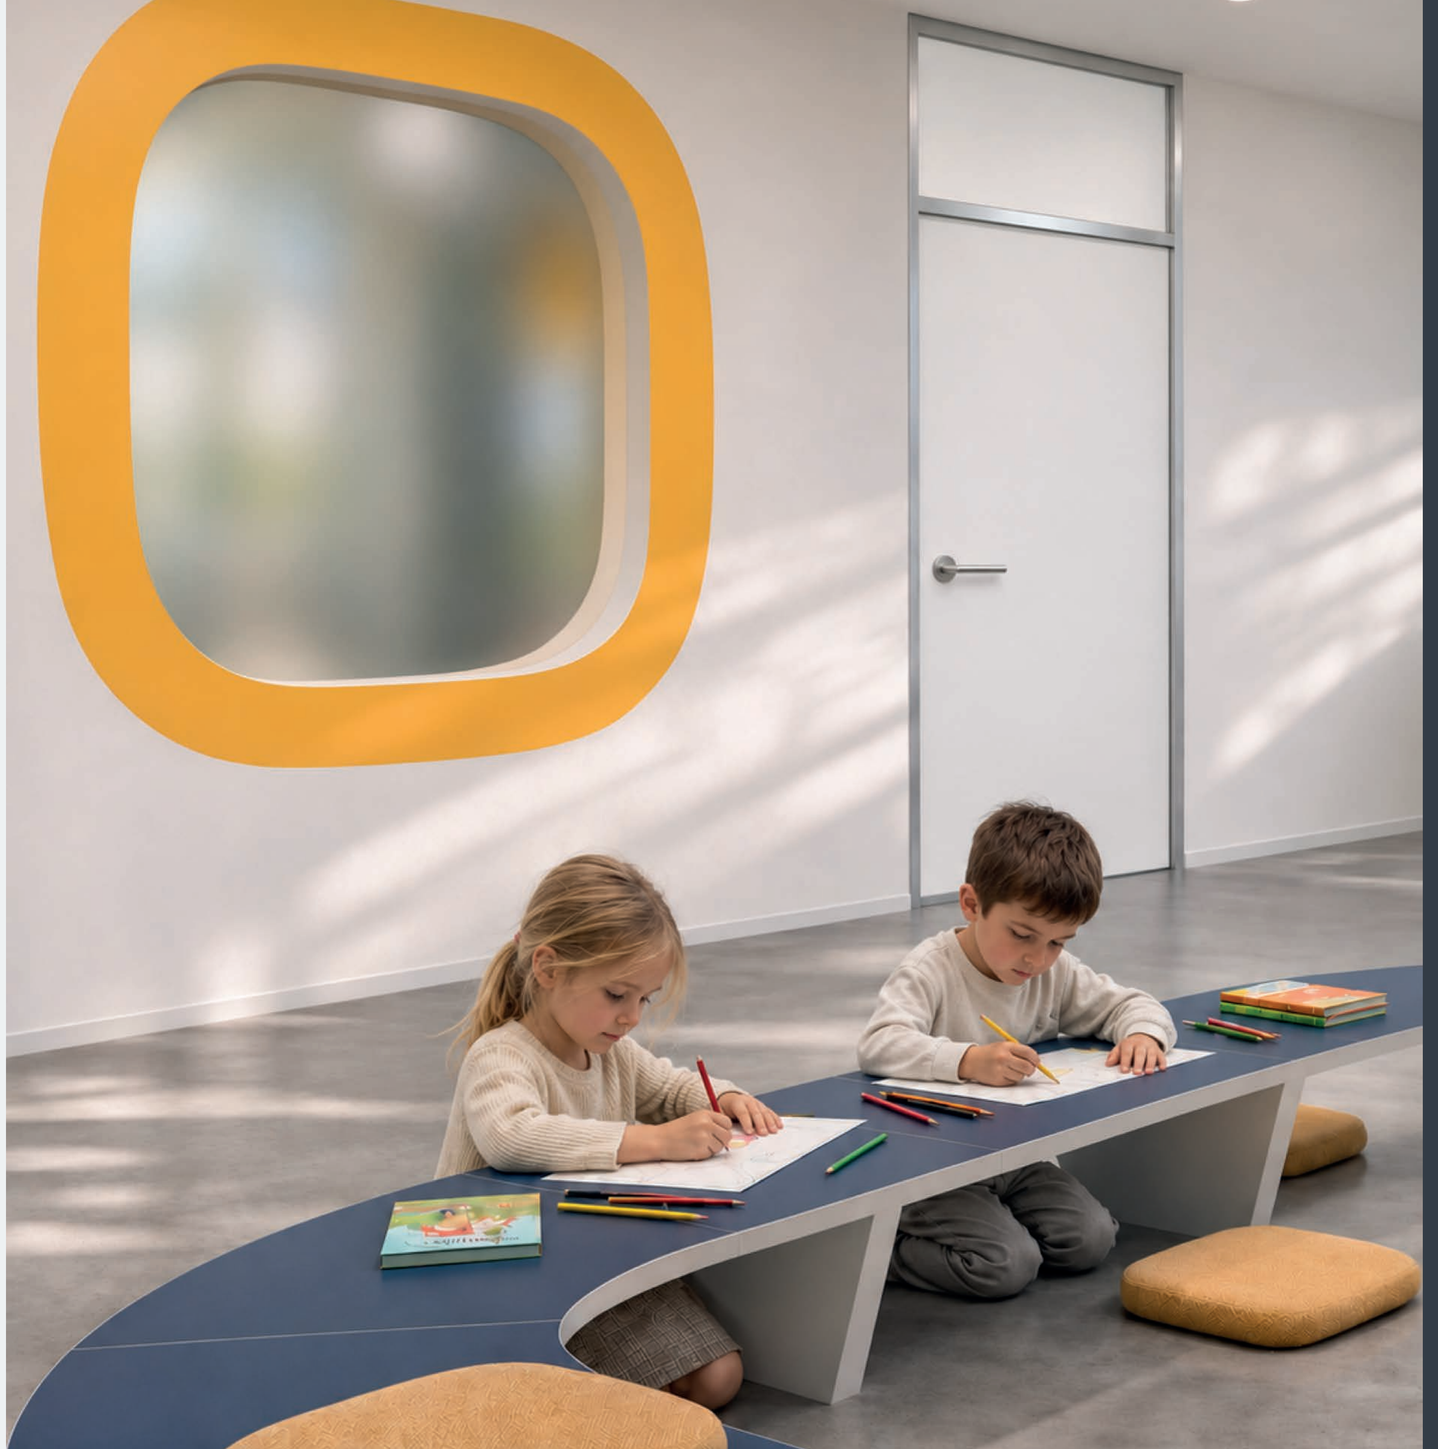

PROJECT — 2025

Oltre Confine

Turning the boundaries of a school into thresholds for learning, inclusion and play.

YEAR	2025
TYPE	Interiors & furniture system
CONTEXT	Master thesis, Design for Children, IED Rome
SITE	Primary school, I.C. Melissa Bassi — Tor Bella Monaca, Rome

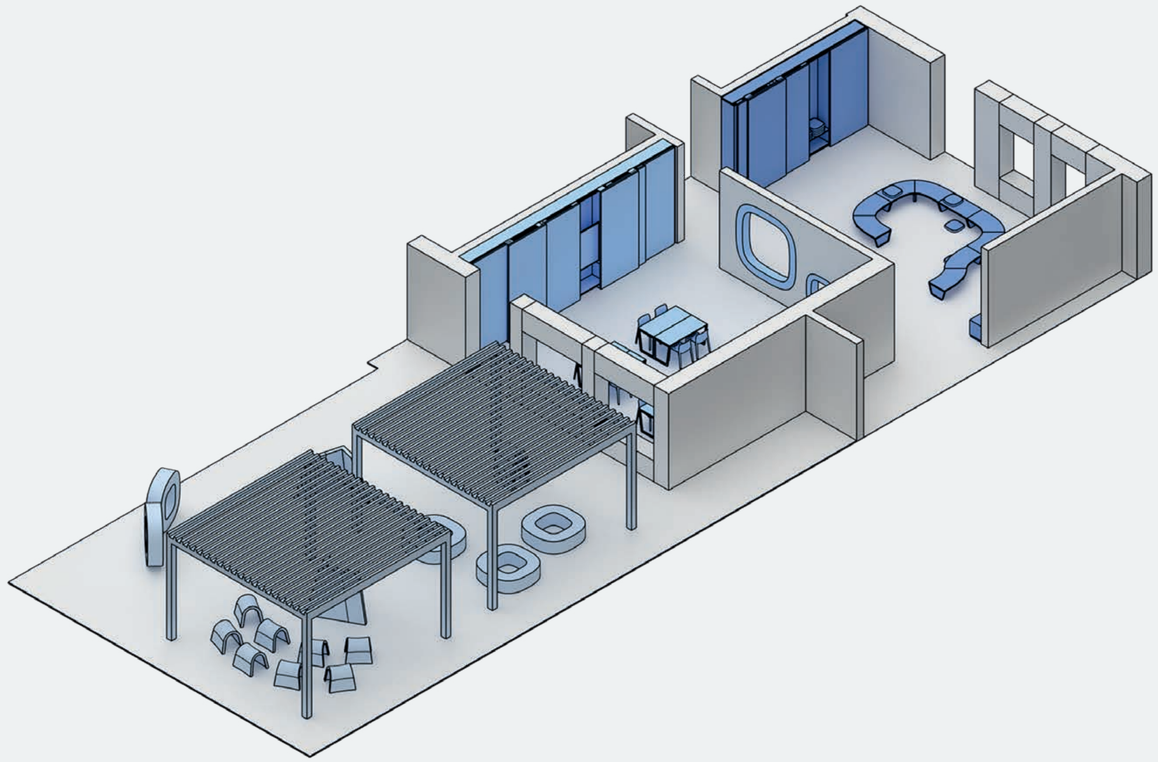

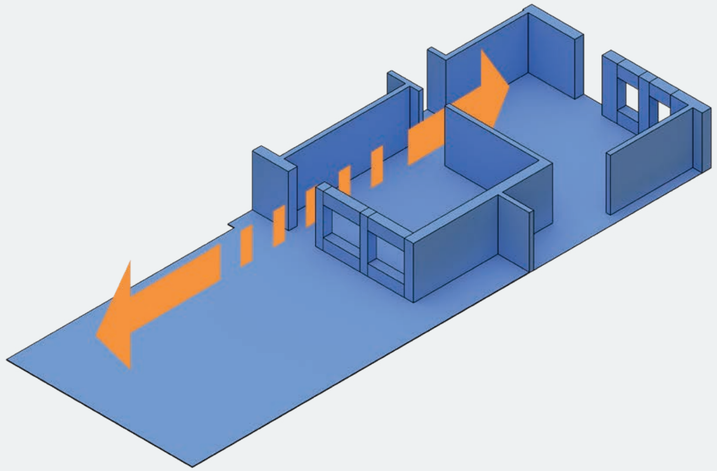

From boundaries to thresholds.

A redevelopment proposal for the primary school of the Istituto Comprensivo Melissa Bassi, in Rome's Tor Bella Monaca district. The intervention rethinks existing spaces to better support learning, inclusion and everyday educational activities.

In traditional schools boundaries are very strong — classroom and corridor, inside and outside — and they limit opportunities for interaction, movement and learning.

The school stops being a sequence of isolated rooms and becomes a continuous ecosystem.

SPATIAL STRATEGY

Corridors open up to the classrooms and the courtyard, becoming shared learning spaces.

Furniture that moves with the children.

A family of light, modular pieces lets each space switch between individual work, group activities and play.

MODULAR DESKS

MULTIFUNCTION BENCHES

SADDLE STOOL

WALL-BOARD

Outdoor

The courtyard becomes a classroom.

Classroom

Flexible islands for group work.

Co-work space

The corridor turns into a shared space.

PROJECT — 2027

BeeSmart

A logic board game for children aged 3 and up, coming to market in February 2027.

RELEASE	February 2027
PUBLISHER	Sassi Junior
ROLE	Game designer — ideation, engineering, concept design
AGE	3+

Logic through play, for the youngest players.

Designed for Sassi Junior, BeeSmart is a logic board game that helps children aged 3+ develop early reasoning skills through play.

I followed the project from the first idea to the engineering of components and the concept design of the final product.

PRODUCT UNDER NDA

Full project available on request after the February 2027 launch.

RIGHTS ACQUIRED BY SASSI JUNIOR

Maker

Small objects, designed and produced in-house.

Through Paglieri Design Lab I design, prototype and manufacture small series with FDM 3D printing and laser cutting — from the first sketch to the finished piece.

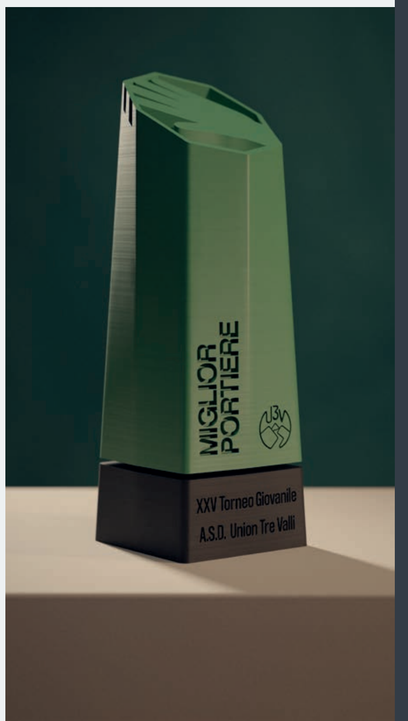

Season awards

A family of three trophies for the football club A.S.D. Union Tre Valli — Best goalkeeper, Top scorer, Best player. A faceted body rises from a personalised base; each award has its own colour and its own sculpted top.

3D PRINTING · 2026

Thank you for your time.
